

OCULUS Facial Cosmetic Surgeons

DR. CHIP COLE

Why should “A World of Millimeters” matter to you?

OCULUS is a specialized center for cosmetic and reconstructive surgery of the eyes and face and prides itself for going *beyond excellence* in customer care. Dr. Chip Cole, founder, is exceptionally unique in his field because he performs Oculoplastic Surgery, combining expertise in both ophthalmology and plastic surgery.

With original study in ophthalmic surgery, Dr. Cole’s orientation is in microsurgery of the delicate and specialized tissue of the eye region—“A World of Millimeters.” Most cosmetic surgeons originally trained in general surgery or ear, nose, and throat surgery—a world of inches. In cosmetic surgery, a millimeter can be the difference between success or failure in the face and eye region.

Dr. Cole is a quadruple board-certified Ophthalmic Plastic & Facial Cosmetic Surgeon who has performed over 14,000 surgeries in the last 15 years. He is one of only 500 surgeons worldwide certified by the American Society of Ophthalmic Plastic & Reconstructive Surgery.

Dr. Cole’s philosophy is, “A surgical approach should restore and refresh people’s own natural beauty.” When considering facial cosmetic surgery to rejuvenate facial features and diminish signs of aging, be sure you understand that a surgeon specializing in “A World of Millimeters” is dedicated to patient safety, comprehensive excellence in care, and natural-looking results.

Call today for your complimentary consultation with Dr. Cole for a *beyond excellence* experience!
